

# Cutimed® Sorbact®

Safe and effective infection management

Up to **73 %**  
bacterial reduction  
in critically  
colonised wounds<sup>1</sup>

## Cutimed®

<sup>1</sup> Mosti *et al.* Comparative study of two antimicrobial dressings in infected leg ulcers: a pilot study. *J Wound Care.* 2015 Mar;24(3):121-2; 124-7

Why not  
choose a  
dressing with a  
purely physical  
mode of  
action.

Cutimed®  
Sorbact® does  
not release any  
antimicrobial  
agents into the  
wound.

# It's time to go down a new path.

Due to the **purely physical mode of action**, **Cutimed® Sorbact®** binds and removes bacteria without the release of any antimicrobial agents. So experience the effectiveness of **Cutimed® Sorbact®**. **Together we can make infection management safe in every respect.**

**Easy**  
No known  
contraindications

**Safe**  
Binds bacteria  
and fungi

**Clinically  
Proven**

Demonstrated ability  
to reduce bacterial  
burden in critically  
colonized wounds  
up to 73 %<sup>1</sup>

## Safely binds bacteria and fungi

**Cutimed® Sorbact®'s effectiveness** is based on a **purely physical mode of action**. This creates a variety of benefits, which make your **daily work safe**:

- No contraindications known\*
- No release of antimicrobial agents
- Low risk of allergies

In addition, the dressing can be used for:

- prolonged duration of treatment\*\*
- Children\*
- Pregnant and breastfeeding women due to its physical mode of action\*

\* Consider limitations mentioned in the IFU in regard of Cutimed Sorbact gel

\*\* The dressing changes should be considered acc. to patient specific needs and limitations given by the IFU.

Cutimed® Sorbact®  
provides

**all-round**  
infection management

## Ease your work with convenient solutions

1. Choose **Cutimed® Sorbact®** for **prevention and infection management**<sup>1,2</sup>
2. Be safe as you can use it for **chronic and acute wounds** with no known contraindications
3. Ease your **application** 
4. Treat **superficial and deep wounds** 

<sup>1</sup> Stanirowski et al. Randomized Controlled Trial Evaluating Dialkylcarbamoyl Chloride Impregnated Dressings for the Prevention of Surgical Site Infections in Adult Women Undergoing Cesarean Section. Surg Infect (Larchmt). 2016 Aug;17(4):427-35

# Cutimed® Sorbact® safely binds bacteria purely physically

An **infected** and **colonised** wound.

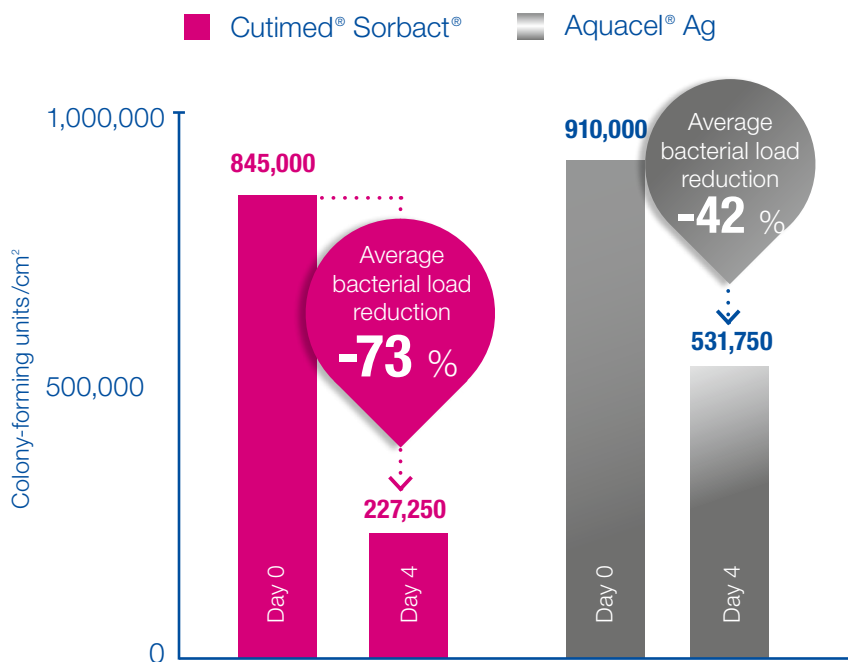

**Cutimed® Sorbact®** is applied directly to the wound. Bacteria and / or fungi are attracted to the **Sorbact®** mesh.

Bound pathogens are removed **with each dressing change**.

# Cutimed® Sorbact® has demonstrated proven effectiveness

In a randomized, comparative, single site study of 40 patients with leg ulcers, **Cutimed® Sorbact®** was more effective at reducing bioburden than Aquacel® Ag.<sup>1</sup>

| Cutimed® Sorbact®              |   |   |
|--------------------------------|---|---|
| Mode of action                 | Features  | Benefits  |
| Purely physical mode of action | No release of antimicrobial agents                  | May help reduce potential for additional irritation   |
|                                | Does not release additional endotoxins <sup>2</sup> | May reduce potential to cause additional inflammation and delay in wound healing <sup>3</sup> |
|                                | No known mechanism of resistance has been described | May help reduce the risk of generating resistant strains of bacteria                          |

# Cutimed® Siltec® Sorbact®

## proven quality – no compromises

**Cutimed® Siltec® Sorbact®** combines the benefits of infection and exudate management by using a **bacteria-binding wound contact layer** and an **innovative, gentle foam**. It is suitable to manage the bacterial load in moderate to highly exuding wounds.

# Individual and easy in its application

Due to the **special shapes** and ease of cutting, **Cutimed® Siltec® Sorbact®** can be used for all body parts, even highly contoured ones.

**A detailed application poster is also available.** Please ask your sales representative for further information.

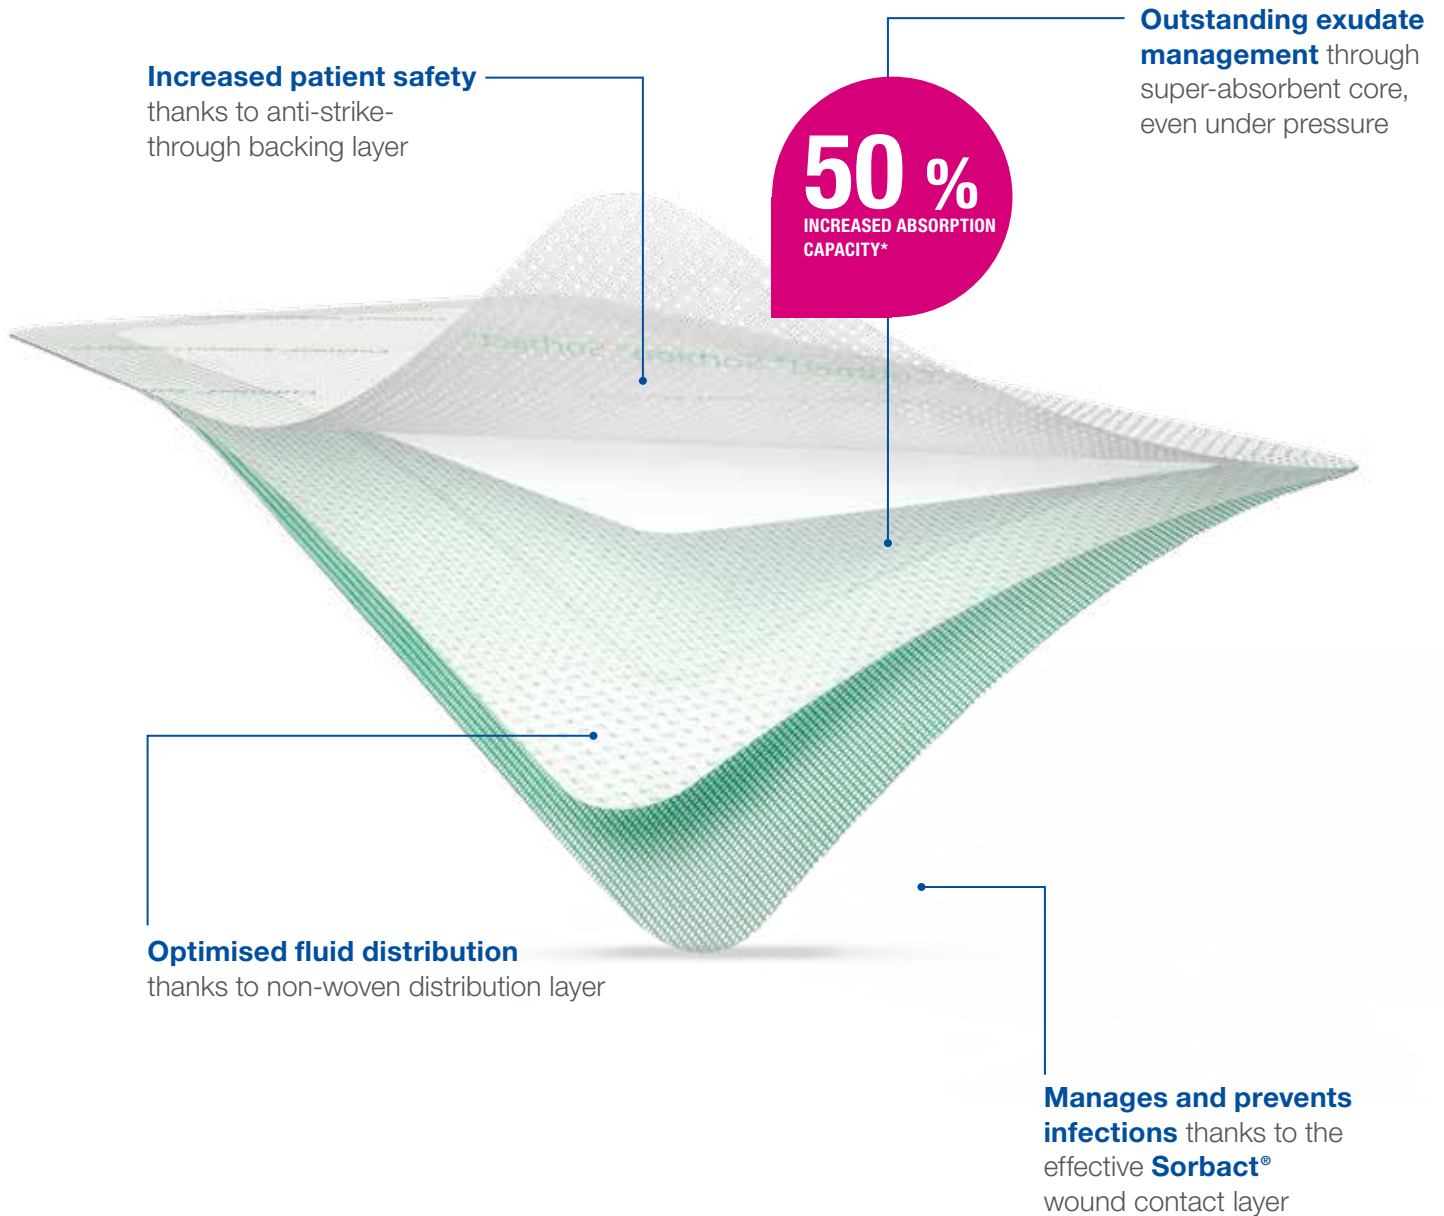

To alter the shape of the dressing you can make additional cuts within the fixation border – not the foam.

# Cutimed® Sorbion® Sorbact® powerful exudate management

Cutimed® Sorbion® Sorbact® enables safe infection management and handles large amounts of exudate at the same time due to the super-absorbent core.

\* In comparison to competitive super-absorbers – data on file.

# Cutimed® Sorbact® Hydroactive B stimulates the wound

Cutimed® Sorbact® Hydroactive B manages infections and stimulates autolytic debridement of fibrin and necrotic tissue.

**3-IN-1**  
SOLUTION

**Eases total treatment** by combining autolytic debridement, exudate and infection management

**Allows patient mobilisation** thanks to safe fixation through hydrogel adhesive border

**Supports** autolytic debridement

**Manages and prevents infections** thanks to the effective **Sorbact®** wound contact layer

**Cutimed® Sorbact® is suitable for clean, colonised and infected wounds such as:**

- Chronic wounds (e.g. venous, arterial, diabetic or pressure ulcers)
- Postoperative dehisced wounds
- Traumatic wounds
- Wounds after excision of fistulas and abscesses
- Dermal fungal infections

The appropriate Cutimed® Sorbact® dressing needs to be chosen out of the entire portfolio.
